1976 Article Index

Systems Management Principles

A new look at suggestion systems (Jan.)
Article surveys types of suggestion systems in practice and the rewards employed. Author up-dates an old managerial tool for increasing efficiency.
Dr. Vincent G. Reuter

Systems survivorship in time of crisis (Jan. - Nov.)
A. P. Pathe

Productivity — to be or not to be (Jan.)
Howard B. Burdeau

Systems managers speak out on profession's directions (Feb.)
An "inside" report on what systems managers consider the important functions of their jobs and where the systems emphasis will be in 10 years.
Edward O. Joslin and Richard A. Bassler

What makes a successful systems person? (Mar.)
The author explores the ingredients of education, training and creativity as they contribute to success in systems work and shows paths to professional growth.
Dr. Robert E. Seiler

Attitude: Success element for women in business (Mar.)
No amount of legislation or company policy will assure women achieving goals unless they themselves are psychologically prepared to fill the vacancies that await.
Hank E. Koehn

Future of telecommunications (Apr.)
Article forecasts the events of the next five years in telecommunications.
The Yankee Group

Planning a secure system (July)
Article details the specific organizational risks, goals and priorities necessary for the protection of information.
Jerome Lobel

MBO — Quo vadis? (Sept.)
Heinz Weihrich

Curriculum planning: a systems approach (Sept.)
Alexander M. Gottesman

Administrative secrecy and privacy legislation (Oct.)
Author reviews international privacy and security legislation and forecasts the regulated business environment.
Paul B. Demitriades

Managing The Systems Effort

A new look at suggestion systems (Jan.)
Article surveys types of suggestion systems in practice and the rewards employed. Author up-dates an old managerial tool for increasing efficiency.
Dr. Vincent G. Reuter

Participative management model (Jan.)
How do you encourage participation in planning, decision-making, communication and evaluation of a system by the people involved?
Dr. Howard L. Sampson

Be a more effective program manager (Feb.)
Author relates general principles of management to the complex job of program management.
Fred L. Friend

Conducting better interviews (Feb.)
Interviewing is a form of communication. Author shows how it is possible to enjoy an interview situation and gather the necessary facts.
Thomas R. Gildersleeve

Reducing conflict between computer programming and operations
Here are practical ideas on how to reduce divisiveness that naturally arises between software developers and hardware operators. (Mar.)
Alan E. Brill

Leadership effectiveness in systems (Mar.)
Thomas H. Idema

Auditor and the systems audit (Apr.)
Awareness of the audit function can enhance the reliability of DP financial and accounting systems.
Marvin O. Tharp

Four systems analysis tools (Apr.)
Author describes four basic concepts used to analyze any system.
Gerald E. Nichols

Placing the DBA (May)
The author details the functions of the Data Base Administrator and his authority within the organization.
Ronald G. Ross

Leadership of the systems development team (May)
Systems persons must effectively influence the opinions, attitudes, and behavior of subordinates to make any system function.
C. James Bacon

Data administration: key to better management (May)
Data administration is a key to better long-term data resource management and to improving the competitive posture of the firm.
Dr. Warren N. Minami

The comput-a-cator in business (May)
The communications within business systems can be improved with a simple formula of attention, interest, decision and action.
Arnold M. Kneitel

Program measurement system (June)
Joel C. Anderson and Richard J. Shakman

Determining systems success (July)
Author shows how to isolate factors important to systems and measure their criticalness to total systems success.
Dr. Deane M. Carter

Total costs of systems services (July)
An in-depth analysis of the total support of systems and EDP services.
William H. Lehman

Declaring independence of office protocol (Aug.)
Author examines the elements that create stress and the desire to declare your freedom from organizational structure.
Dr. Gibbs Myers

General fault tree for waste (Aug.)
The fault tree graphically shows waste situations and aids in determining the changes required.
Joseph W. Wenger

Presenting and selling systems recommendations (Oct.)
The best systems ideas can be disregarded because of a poor presentation. Author tells how to handle this crucial step.
Richard F. Neuschel

Fine-tune your systems (Nov.)
Fine-tuning a system after it is installed, debugged and operating can double the benefits.
Leslie H. Matthies

ABC method to inventory control (Nov.)
Author reviews the "vital few and trivial many" concept of Pareto's Law as an unsophisticated business practice.
Dr. Vincent G. Reuter

Methods improvement with Pareto's law (Dec.)
Author relates Pareto's law to accounting data, work distribution charting, work sampling, work counts and nose counts.
Dr. Vincent G. Reuter

Developing a project management package (Dec.)
Frazier, Haugg and Thackery

Selection and Training of Systems Personnel

Is today's systems education adequate? (Jan.)
Comments based on a survey of 168 schools offering degrees in systems.
Vince Helker and Donald Galli

Counselor Jekyll and consultant Hyde (July)
Herman Limberg

Instant analyst education (July)
In the morass of what constitutes systems education, this author takes a humorous view of fictious courses that could be offered.
Merle P. Martin

Legal limits in personnel systems (Aug.)
Dr. Jack L. Simonetti, et al.

Employee appraisal systems (Aug.)
R. S. Silverman and Irv. B. Menessa

Analyzing systems analysts (Aug.)
Robert Braun Campbell

Eliminate your obsolescence (Nov.)
James E. Miller

Information Collection, Storage, Retrieval

Evaluating data base management systems (Jan.)
Author lays down general criteria for evaluating a DBMS and then examines the advantages and disadvantages of six current systems.
Ronald G. Ross

OCR — where it's going (Feb.)
Here's a look at OCR's state-of-the art, the best current applications and a prediction of what the future holds.
Dr. Gordon B. Baty

Forms as a sympton of business health (Feb.)
Dr. Gibbs Myers

New horizons for data base (Mar.)
Clifton Rucker

Color codes in systems work (June)
Konrad Sadek

Materials information system (June)
A three-phase plan for an effective materials management program.
B. J. Harris and L. A. Rulis

Data base master plan (July)
The author describes a step-by-step development of a data base for a government installation.
Ruth F. Dyke

1976 Article Index

Forms Management: Part 1 — Why forms management? (Sept.)
Article tells where to start in forms design and provides a seven-step process to a successful conclusion.
Dr. Gibbs Myers

General input edit (Oct.)
Stephen G. Schur

Forms management Part 2: How to design business forms (Oct.)
Article tells where to start in forms design and provides a seven-step process to a successful conclusion. **Dr. Gibbs Myers**

Forms management: Part 3: Forms construction and printing (Nov.)
Author describes cost-saving techniques for designing and specifying ten different kinds of forms.
Dr. Gibbs Myers

Forms management Part 4: — Forms logistics (Dec.)
Article details procedures for ordering and controlling forms in an efficient forms management system.
Dr. Gibbs Myers

Good forms design cuts costs (Dec.)
How planning can reduce costly errors in forms design and effect savings.
Jack Silas

Management responsibilities for safeguarding information (Dec.)
Information security is changing the way systems are designed and operated. Author relates the impact of these event to protective procedures.
Belden Menkus

ADP Including Hardware, Software Applications

Computers create social issues (Feb.)
Article identifies several sociological issues related to computers and discusses their importance. No prescriptions for solving the problems.
Dr. Edward Alexander Tomeski

Continuing need for technical awareness (Mar.)
The need for technically trained professionals is a growing need with EDP operations. Author details areas of necessary expertise.
Paul A. Fink

Microcomputer technology report (Mar.)

Guidelines for computer selection (Mar.)
Criteria for analyzing proposals for computer systems and pitfalls to be avoided.
W. B. Foss

Management of software development (Apr.)
Authors describe structured programming as a framework for improving the management of software development.
Dr. Robert L. Paretta and Stephen A. Clark

Purchase or lease? (June)
Article shows the various methods of determining actual computer selection costs based on the many variables for most organizations.
Gregory Weidler

Small EDP shop risks (June)
Author marks the hazards in developing a successful in-house MIS for a small company and how to avoid them.
Dr. Clyde W. Neu

Telecommunications network conversion (July)
Article discusses a recommended procedure for converting an in-house computer system to a telecommunications enfironment.
Dr. Floyd Miller

Computerized health care systems (Aug.)
Article shows how cost/efficiency in four hospitals' health care systems benefit all concerned.
Dr. Robert B. Fireworker

Computer project management — proposal, design and programming phases (Aug.)
Author gives steps to maintaining the elusive balance between sufficient control and reasonable costs in project management projects.
George A. Khtaian

Structured programming: miracle or mirage? (Aug.)
Stephen N. McCoy

Cost of using excess capacity (Sept.)
Article presents a method for correct cost estimating in determining the use of excess capacity.
Edwin L. Heard

Debugging overlay abends (Sept.)
Author describes two techniques for debugging overlay structured modules at the core dump.
Bernard H. Boar

Structured, structured . . . (Oct.)
Duane C. Abbey

Management guide to computer protection (Nov.)
Numerous steps are given to help management protect the computer and the ultimate privacy of the company itself.
Robert H. Milligan

Management Sciences

Behavioral information systems (Mar.)
To maximize effectiveness of management information systems, the technical information must be complemented with behavioral facts.
Frederick A. Starke and Thomas W. Ferratt

Models: Decision tools for management (Oct.)
Authors describe models used by systems professionals to aid in management decisions.
Richard J. Tersine and Walter E. Riggs.

Management Information Systems

Planning MIS acceptance (Jan.)
Leland M. Daniel

A disaster recovery plan (Feb.)
Where do you start to recover from and EDP disaster? Author tells recovery steps and offers prevention tips.
Joseph A. Martincic

Integrated MIS: a data base reality (Feb.)
The heralded potential of MIS can now be realized through corporate-wide data base structures. Mangement information integration is now a reality.
Paul J. Beehler

Behavioral information systems (June)
To maximize effectiveness of management information systems, the technical information must be complemented with behavioral facts.
Frederick A. Starke and Thomas W. Ferratt

Materials information system (June)
A three-phase plan for an effective materials management program.
B. J. Harris and L. A. Rulis

Internal controls and audit (June)
During the development of a MIS a point is reached where everybody talks about internal controls, audit trails and internal audits.
Ioannis Methodius

Long-range MIS planning (July)
Article reveals results of a 20-company survey on long-range MIS planning.
Dr. V. Soden and Charles C. Tucker

Supporting on-line systems (Sept.)
James Joy

MIS for pro basketball (Nov.)
Donald R. Moscato

Graphic Presentation and Reports

Installation of a documentation system (Jan.)
Article describes the events leading to the decision to have a documentation system, its design, its implementation and the positive results.
Richard M. Mitchell

Functional manuals and formats (May)
Author answers the basic questions of how to lay out a procedures manual and presents guidelines for the arrangement of the facts on the page.
Clyde W. Jackson

Desk instructions (May)
Richard A. Kaumeyer, Jr.

Standardizing procedure documentation (June)
Standard file documentation is an essential component of effective management control. Article shows typical procedure forms.
Robert B. Campbell

Report generator for accountants (Sept.)
Consolidating financial statements is made easy with the use of the report generators described.
T. L. Reugg

Effective systems reports (Sept.)
Author describes systems improvement recommendations as the surest sign of report effectiveness and how to get there.
Belden Menkus

Effective reporting structures (Nov.)
Article explores the range of management reports and characterstics to consider in their design.
Dr. Joseph W. Wilkinson

Systems Case Histories

POS systems revolutionize retailing (Apr.)
Design and installation of improved transaction management information systems are described in detail by these authors.
Dr. Joseph W. Wilkinson and William G. Mitchell

Auditor and the systems audit (Apr.)
Awareness of the audit function can enhance the reliability of DP financial and accounting systems.
Marvin O. Tharp

Total costs of systems services (July)
An in-depth analysis of the total support of systems and EDP services. P services.
William H. Lehman

Computerized health care systems (Aug.)
Article shows how cost/efficiency in four hospitals' health care systems benefit all concerned.
Dr. Robert B. Fireworker

General fault tree for waste (Aug.)
The fault tree graphically shows waste situations and aids in detrmining the changes required.
Joseph W. Wenger

Production library serves large system (Sept.)
Management of production files can improve operations capability, stability, and integrity.
D. L. Schiefer

Curriculum planning: a systems approach (Sept.)
Alexander M. Gottesman

A bar coded mail system: Postal Service solution (Dec.)
As the U.S. Postal Service becomes more labor intensive, service poorer and rates higher, this article presents a systems solution.
Dr. James Rawlings Sydnor
